

Bariatric PowerLift Stirrups (Pair), with clamps

BF454

The integrated power assist mechanism in STERIS Bariatric PowerLift Stirrups provides excellent surgeon access and virtually effortless patient positioning of patients up to 720 lbs, depending upon the table used. The extra large boots and pads provide comfort and security. The unique grip-and-twist control handles allow staff to adjust the angle of Lithotomy and degree of ab/adduction during set up and during the procedure without lifting the sterile drape.

Range of motion: 84° / - 33°, Ab/Adduction: 25° / - 9°.

Includes siderail clamps and pads.

Maximum patient Patient Weight Capacity is 720 lbs (326 kg)

Replacement Pad(s): BF16 (set), BF191 (Left), BF192 (Right)

To be used with US side rails
