7080 Hand Control (With Detacheable Cord)

BF00315

CE

The 7080 Hand Control completely revolutionizes table operation and patient positioning. From the ergonomic shape to the large, data rich LCD screen, users can clearly and easily articulate the surgical table with real-time feedback such as degree or inch increments. The hand control buttons contain a similar color scheme as existing STERIS hand control designs for easier muscle memory. Comes with an LED task light on the back and a detachable cable for easy replacement. Also features haptic (vibration) feedback upon articulation limit or at a potential collision point.

For 7080 International surgical table
