

Powerlift Beach Chair

BF00245

The PowerLift Beach Chair is a lightweight beach chair that provides powered patient positioning for open or arthroscopic orthopedic shoulder procedures. Powered positioning of the back-section inclines from 0 to 90 degrees. Removable shoulder panels provide excellent surgical access to each shoulder. Includes removable head restraint device and a lateral brace for left or right-side patient positioning.

Required products: BF039 - Single-use Chin and Head Restraint Straps (12 per case); or BF047 – The Single-Use Face Masks (12 per case)

Patient Weight Capacity: 500 lbs (227 kg)

Optional Accessories: Shoulder Chair Dolly (BF046)
