Short Leg Section

BF020

The Short Leg Section improves caregiver ergonomics and operating room workflow efficiency for surgical staff during many surgical procedures. Due to its length of 18 inches, there is no need to detach and reattach the compact surgical leg section during a procedure. The leg section can remain attached to the surgical table and be lowered throughout the procedure. Includes Perineal Cutout. Hook and loop Pad attachment only. 2" TLT Pad included.

Not CE marked product
