

# Bariatric Nissen Thigh Straps (Pair)

BF15

The Bariatric Nissen Thigh Straps are used to help support the patient during steep reverse Trendelenburg positioning. Conductive straps encircle the upper thigh with a broad soft pad. Airplane-style buckle permits convenient length adjustment. Pad is 7” (18 cm) wide and 31” (79 cm) long. Straps are adjustable in usable length up to 70” (179 cm).

Patient Weight Capacity: 1000 lbs (454 kg)

Not CE marked product

To be used with US side rails only
