

Adult Nissen Thigh Straps (Pair)

BF14

The Adult Nissen Thigh Straps are used to help support the patient during reverse Trendelenburg positioning. Conductive straps encircle the upper thigh with a broad soft pad. Airplane-style buckle permits convenient length adjustment. Pad is 4.5” (11.4 cm) wide and 20” (51 cm) long. Straps are adjustable up to 48” (122 cm).

Patient Weight Capacity: 500 lbs (227 kg)
