Lower Body X-Ray Protection Shields

UT6020

CE

The system is comprised of multiple, table-mounted x-ray protection shields for lower scattered radiation. The Lower Body X-Ray Protection Shields have rounded edges for low injury risks and a large protection zone against x-ray radiation scattering for the examiner and the assistant. These panels are an indispensable safety tool for the physician and staff and have long been an established standard in interventional radiology.

Dimensions (top of shield to bottom of panel): 47.6” (1210 mm) x 43.3” (1100mm)

- Height 75cm
- One removable upper shield (31cm) width 50cm
- 3 overlapping panels

CE marked product
